### Hospital Reproductive Health Services

Hospital name: PeaceHealth Southwest Medical Center

#### Additional comments; limitations on services; other services (*continued*)

Operations, treatments, and medications that have as their direct purpose the cure of a proportionately serious pathological condition of a pregnant woman (patient) are permitted when they cannot be safely postponed until the unborn child is viable, even if they will result in the death of the unborn child.

Some services listed on this form may be provided when medically indicated.

Procedures that induce sterility are permitted when their direct effect is the cure or alleviation of a present and serious pathology and a simpler treatment is not available.

The caregiver/patient relationship requires compassionate presence, trust, honesty and confidentiality. The caregiver and patient share responsibility for collaborating to achieve the goals of care.

A handwritten signature in blue ink, appearing to read "Ron Saxton", is written over a horizontal line.
