General Audience

It's more important than ever to get vaccinated against the flu. The flu vaccine can keep you from getting or spreading the flu to others during the [COVID-19 pandemic](#). It also helps keep our hospitals from being overwhelmed. The Department of Health recommends a yearly flu vaccination for everyone six months and older, including people who are pregnant, nursing, or at higher risk for flu complications.

You should get a flu vaccine early in the fall, preferably before the end of October, to be protected before flu viruses start to spread in your community. You can even get your COVID-19 and flu vaccines at the same time. Flu vaccines are widely available at many locations near you, including pharmacies, doctor's offices, and even community events. Visit www.VaccineFinder.org or call the [Help Me Grow Washington hotline](#) at 1-800-322-2588 (language assistance available) to find a flu vaccine location near you.

Flu vaccines for adults are covered by most insurance plans, including Medicaid and Medicare part B, and all children aged 18 and under in Washington can get a flu vaccine and other recommended vaccines at no cost. The provider may charge a fee (called an administration fee) to give the vaccine. You can ask them to waive this fee if you cannot afford it. If you do not have health insurance, you may be able to get a flu vaccine at no cost. Check with your [local health department](#) for more information.

You can help prevent both flu and COVID-19 by washing your hands with soap and water for 20 seconds, covering your coughs and sneezes, and staying home when sick. For more information, please visit www.knockoutflu.org.

Older Adults

It's more important than ever to get vaccinated against the flu. The flu vaccine can keep you from getting or spreading the flu to others during the [COVID-19 pandemic](#). It also helps prevent our hospitals from being overwhelmed. The Department of Health recommends a yearly flu vaccination for everyone six months and older. Flu vaccines are especially important for [adults 65 and older](#) and [people with certain medical conditions](#) to reduce the risk of serious complications from the flu.

You should get a flu vaccine early in the fall, preferably before the end of October, to be protected before flu viruses start to spread in your community. There are additional kinds of flu vaccine available for adults aged 65 and older meant to provide a stronger immune response. Ask your provider or pharmacist which vaccine is right for you. You can even get your COVID-19 and flu vaccines at the same time.

Flu vaccines are widely available at many locations near you, including pharmacies, doctor's offices, and even community events. Flu vaccine is covered by most insurance providers at no cost. If you do not have health insurance, you may be able to get a flu vaccine at no cost. Check with your [local health department](#) for more information.

You can help prevent both flu and COVID-19 by washing your hands with soap and water for 20 seconds, covering your coughs and sneezes, and staying home when sick. For more information, please visit www.knockoutflu.org.

Schools

Dear parents and guardians,

It's more important than ever to get your family vaccinated against the flu. While we are taking precautions to keep our schools clean, we expect the flu may go around this year now that many of our children are back in the building. The flu vaccine can prevent you and your family from getting sick or spreading the flu during the [COVID-19 pandemic](#).

The Department of Health recommends a yearly flu vaccination for everyone aged six months and older, including people who are pregnant, nursing, or at higher risk for flu

complications. For the best protection, your family should get vaccinated for flu early in the fall, preferably before the end of October, to be protected before flu viruses start to spread in our community. You can even get your COVID-19 and flu vaccines at the same time.

Flu vaccines are available at many locations near you, including pharmacies, doctor's offices, and even community events. Visit www.VaccineFinder.org or call the [Help Me Grow Washington hotline](tel:1-800-322-2588) at 1-800-322-2588 (language assistance available) for more information. **All children aged 18 and under in Washington can get flu vaccine and other recommended vaccines at no cost.** The provider may charge a fee (called an administration fee) to give the vaccine. You can ask them to waive this fee if you cannot afford it.

You can help prevent both COVID-19 and flu by washing your hands with soap and water for 20 seconds, covering your coughs and sneezes, and staying home when sick. For more information, please visit www.knockoutflu.org.
