ICAR

Infection Control
Assessment and Response

QUARTERLY METRICS SNAPSHOT

July 1, 2021 – September 30, 2021

During the third quarter of 2021, our team increased our capacity to conduct more onsite and proactive Infection Control Assessments and Response (ICARs) in long-term care settings. Additionally, we launched a new system to capture both ICAR and scheduling data (REDCap). As we continue to schedule ICARS, our team hopes to incorporate more onsite ICAR opportunities, as well as new setting types such as dental and dialysis.
