

VAX IN A MINUTE

October 27, 2023

Keep yourself and your loved ones healthy this year.

Make plans to get vaccinated now. Supplies of updated 2023-2024 vaccines are becoming available in your community!

The CDC says it is safe to receive both flu and updated COVID-19 vaccines at the same time. Save time and get protection against both diseases together.

- People with weakened immune systems who *have not been vaccinated* may need 3 doses of 2023-2024 Pfizer or Moderna COVID-19 vaccine or 2 doses of Novavax to be up to date.
- Those with weakened immune systems who *have been vaccinated* may only need 1 (or more) 2023-2024 COVID-19 vaccine doses.

**Getting vaccinated creates safer spaces
for staff and residents, those with weakened immune
systems, pregnant people, and anyone who lives
or works around them.**
