

VAX IN A MINUTE

December 20, 2023

Now's the time to prevent respiratory illness - get vaccinated!

Prevent respiratory diseases like influenza, COVID-19 and RSV in your community by choosing to get vaccinated now.

Winter is here and hospitalization rates are going up from illnesses caused by preventable respiratory viruses. Getting immunized helps everyone avoid serious viral illness in long-term care settings.

Vaccines can reduce the need for hospitalization if you get sick. Make this season more joyous for yourself and others by avoiding community transmitted respiratory diseases.

Respiratory viruses spread more actively through March. Stay up-to-date on vaccines to help make the new year as healthy and bright as possible!
