

What goes in an Intramuscular (IM) Naloxone Kit?

Quantity	Item	Description & Details
1x		<h3>Clear Plastic Bag</h3> <ul style="list-style-type: none">• Size: 4x6 inch or 6x9 inch• Purpose: Holds all IM naloxone kit supplies.
1x		<h3>Educational Insert</h3> <ul style="list-style-type: none">• Size: 3¹/₃ x 8¹/₂ inch strip• Purpose: Provides opioid overdose and naloxone administration education.• Details: Print on both sides
2x		<h3>Vials of Injectable Naloxone</h3> <ul style="list-style-type: none">• Dose: 0.4mg/mL• Purpose: Used to reverse opioid overdose.• Details: Vial color may vary.
1x		<h3>Small Brown Plastic Baggie</h3> <ul style="list-style-type: none">• Size: 2 x 3³/₄ inch, or a baggie in similar size and dark color.• Purpose: To contain 2 vials of naloxone.• Details: The dark brown bag protects naloxone from light exposure.
2x		<h3>Intramuscular Syringes</h3> <ul style="list-style-type: none">• Size: 25G x 1-1¹/₂ inch needle (3mL syringe)*• Purpose: Used to inject naloxone.• Details: Leave syringes inside their wrappers to keep them sterile. <p>*Syringe and needle size may vary depending on availability</p>

How to Assemble an Intramuscular (IM) Naloxone Kit

These instructions explain how to assemble intramuscular (IM) naloxone kits with supplies provided by the Washington Department of Health Opioid Education & Naloxone Distribution (OEND) Program. Each IM naloxone kit will contain enough supplies to administer two doses of IM naloxone. Please contact the OEND program at naloxoneprogram@doh.wa.gov with any questions.

1. Fold and insert one educational insert inside the clear bag.

Set aside. The clear bag will contain the rest of the supplies assembled in the IM naloxone kit.

2. Insert two vials of naloxone into the small brown baggie, then seal.

Naloxone is light-sensitive, so this is an important step.

3. Place the brown baggie containing naloxone into the larger clear plastic bag.

4. Insert two IM syringes into the clear bag.

Keep the syringes inside their individual wrappers to keep them sterile.

5. Confirm the contents of the IM naloxone kit include:

- One educational insert
- Two vials of naloxone inside a brown baggie
- Two wrapped IM syringes

For additional information on naloxone administration and the OEND program, please visit our website using the QR code above.

Preparing Intramuscular (IM) Naloxone Kit Educational Inserts

These instructions explain how to prepare educational inserts to include in IM naloxone kits assembled with supplies provided by WA DOH Opioid Education & Naloxone Distribution (OEND) program.

To download a copy of the IM naloxone educational inserts referenced here, please visit the website using the QR code at right.

Naloxone Instructions

1.

Print out the educational inserts.

Set your print settings to:

- Print double sided (on both sides of paper)
- Flip on short edge

front:

flip

back:

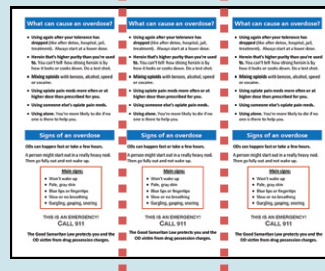

2.

Cut each sheet into three strips to make three educational inserts from one sheet.

Use scissors or a paper cutter to make two cuts vertically down the sheet.

3.

Fold each insert in half crosswise (hamburger style) to fit inside clear baggie.

Set aside for IM naloxone kit assembly.
